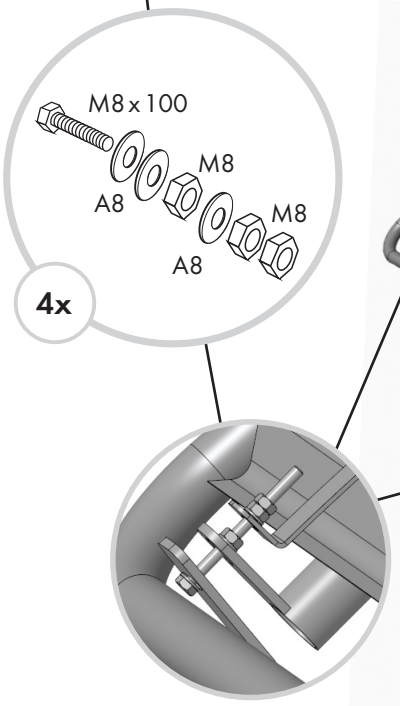
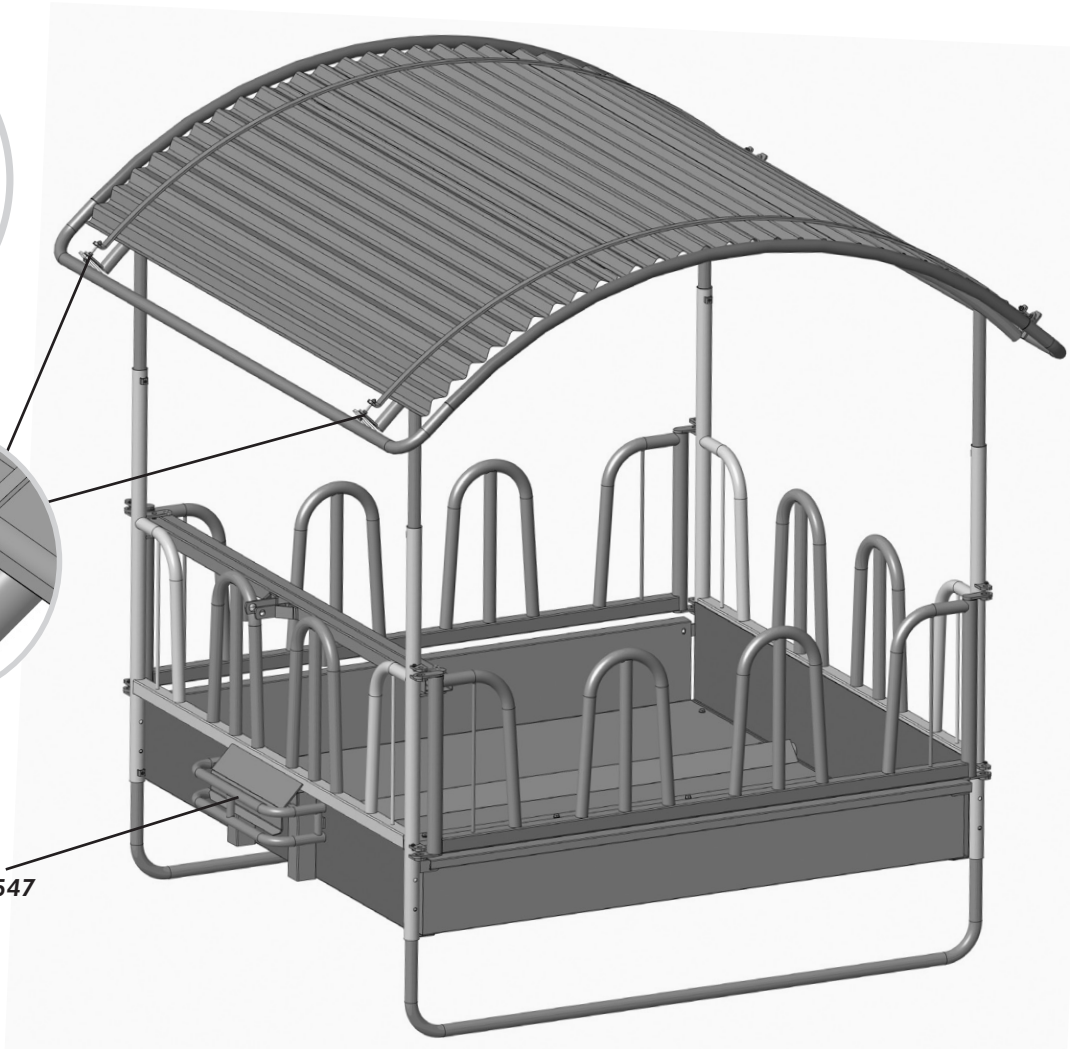
De dakrand-veiligheidsbeugel wordt eerst op de dakboog geschroefd en met de moeren geborgd. Vervolgens worden de dakspanbanden met zelfborgende moeren aangetrokken. ***/ Montaje de la protección del borde del tejado (opcional). La protección del borde se atornilla primero al arco del tejado y se asegura con las tuercas. Luego apretar las cintas de tensión con las tuercas de auto-bloqueo.***

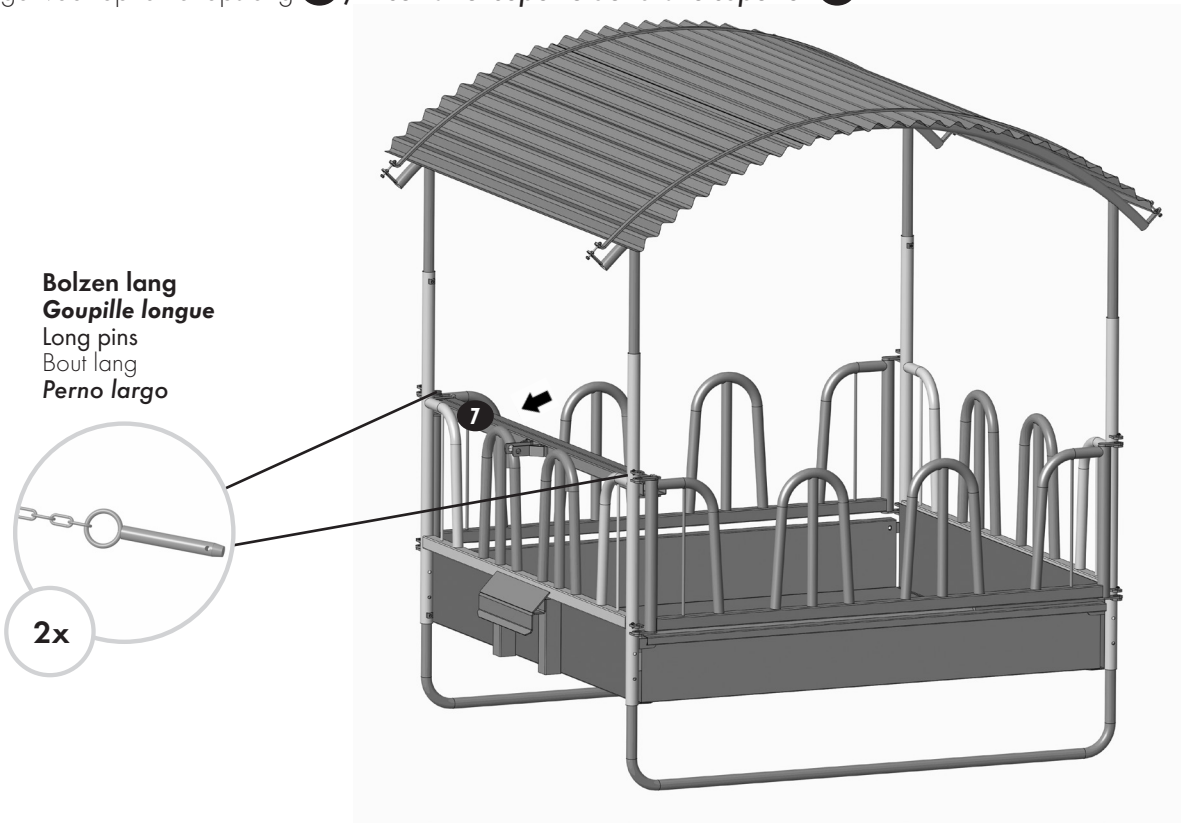
Dachkanten-Schutzbügel 303573
Protection toit 303573
Roof edge protection 303573
Dakrand-veiligheidsbeugel 303573
Protección del borde del tejado 303573





Optional / ***en option*** **/** optional **/** *optioneel* **/** ***opcional*****:**
3-Punkt Schutzbügel 303547
Protection attelage trois points 303547
3-point linkage protection 303547
3-punts-veiligheidsbeugel 303547
Protección tres puntos 303547

12. Oberlenkeraufnahme 7 einsetzen / *Installer le bras de levage* 7 / Insert upper link support 7 / Plaats de beugel voor opname topstang 7 / *Insertar el soporte del brazo superior* 7



Einsatzhinweise
- Bei Einsatz von agressiven Futtermitteln (z. B.Silage) sind die Bodenbleche und Seitenteile mit einem Bitumenschutzanstrich zu versehen.
- Die Raufe ist geeignet für den Transport mit einer Fahrgeschwindigkeit von max. 10 km/h im ungefüllten Zustand.

Instructions
- Il est conseillé de recouvrir l'auge d'une couche d'enduit de protection contre la corrosion en cas d'utilisation d'ensilage.
- Le râtelier est adapté pour être transporté à vide avec une vitesse maximum de 10 km/h.

Application notes
- In the event of filling with silage bales, the base plates and side frames should be given a bitumen coating.
- The feeder can be moved at a maximum speed of 10 km/h when empty.

Gebruiksaanwijzing
- Bij gebruik van silage balen moeten de bodemplaat en de zijdelen met een beschermende bitumenlaag voorzien worden.
- De lege ruif is geschikt voor een transport met een maximale snelheid van 10 km/h.

Modo de empleo
- En el caso de que se utilicen silo-pacas, habrá que proteger las chapas de suelo y los laterales con una pintura anticorrosiva.
- Comedero vacío adaptado para un transporte con tractor, con una velocidad máxima de 10 km por hora.
